ROCK SCISSORS PAPER

As a starting point, artists were given the above three words, with *rock* representing three-dimensional works, *scissors* for all things that had been cut and *paper* for flat works including drawing and painting.

This exhibition features work from 13 artists from across the globe. Each artist's interpretation of the theme uniquely deals with the ever changing world in which we live.

The opening night will feature an interactive installation piece by curator Martyn Thompson, as well as a performance by Lillian Juana from UnEnding.
